# BELL HP7

Bell Racing is proud to announce the introduction of the new HP7, a state-of-the-art and innovative helmet conceived for open cockpit racing. The HP7 is the direct result of a never ending intense Research & Development program by our international team of engineers and their close collaboration with Formula One drivers and teams.

Meeting or exceeding Snell SA2010 Standard and FIA8860-2010 Advanced Helmet Standard, the HP7 benefits from the latest technological evolutions and innovations in the fields of aerospace and military grade composite materials and energy absorbing materials.

At Bell Racing, function always comes first. Styling is considered as an important second step, but can never be detrimental to efficiency. The result is a sleek, lightweight and efficient HP7 helmet, setting up new standards in the small and coveted world of open cockpit racing.

HP7 is available in two different versions, with or without chin bar duckbill (front spoiler).

Recommended Retail Price: euro 2450.00 + Tax

**2013 FORMULA 1 DRIVERS WEARING BELL HP7**

Super high strength carbon composite shell, made in Bell Racing's high pressure proprietary molding system, allowing pressures up to twice as high as in conventional autoclaves, combined with titanium hardware.

Shell & shield design have been optimized by moving the shield pivot points to a lower position, conferring cleaner sides, benefiting to aerodynamic behavior, energy absorbing capacities and acoustic comfort.

Optical grade injected Double Screen Anti Fog shield, with variable thickness exceeding 5mm in the field of vision, setting up new standards in vision quality and fog control.

Improved shield sealing thanks to a new specific hollow synthetic rubber gasket, ensuring that no air and mainly no water in wet conditions can penetrate into the helmet through the eyeport.

New ergonomic interior, using multiple densities comfort foams and padding to ensure best possible fit to a variety of head shapes.

Chin guard removable face piece, available in various thicknesses to accommodate all kind of cheeks and jaw shapes, with integrated channels offering multiple possibilities to install the optional integrated drinking tube system and all kinds of radio microphone systems.

Optimized ventilation thanks to a total of no less than 14 air intake and extraction channels strategically located around the shell, ensuring perfect ventilation all around the head and the face.

HP7 is available in two different versions, with or without chin bar duckbill (front spoiler).

### SE07 VISOR

REGULAR	Clear (60270100) - Smoked (60270200) - Dark (60270300) - Yellow (60270400)	euro 80,00 + Tax
MIRROR	Silver (60271000) - Gold (60271100) - Blue (60271200) - Pink-Red (60271300) - Iridium (60271400)	euro 110,00 + Tax
MULTILAYER	ML Red (60272000) - ML Blue (60272100) - ML Green (60272200)	euro 125,00 + Tax

# ACCESSORIES

Various aerodynamic appendixes, such as air intakes, air extractors, spoilers and chin bar gurneys are available to ensure perfect cooling and perfect helmet stability at high speed in the most challenging open cockpit car environments.

## CLEAR SPOILER

Spoiler HP7 Clear (1): optimizes airflow and stability of the helmet (63720020).

Recommended retail price: euro 65,00 + Tax

## AIR INTAKE 2 PARTS

Air intakes (2): optimize ventilation inside the helmet. They come as standard equipment on the HP7 and are also available as a separate accessory (63750020).

Recommended retail price: euro 25,00 + Tax

## SIDE AIR INTAKES

Air intakes (3): optimize inner ventilation on the side of the head. Available as a separate accessory (63751010).

Recommended retail price: euro 25,00 + Tax

## SIDE AIR EXTRACTORS

Side Air Extractors (4): provide an effective way to extract hot air from inside the helmet, particularly useful in rainy conditions (63751020).

Recommended retail price: euro 25,00 + Tax

## CHIN BAR GURNEY

Clear Chin Bar Gurneys (5): stabilize the helmet by adding downforce to the front of the helmet, reducing the lift effect and counteracting drag. Available in 8mm width (Medium) (63760020) and 13mm (Large) (63760025).

Recommended retail price: euro 25,00 + Tax

## TEAR-OFFS

HQ 0,25mm (Pack of 10) (63030000).

Recommended retail price: euro 20,00 + Tax
